Dividers

Further subdivide compartments by sliding dividers into slots of partitions.

STEP 1 - Determine the drawer divider number you will be using the dividers in.

STEP 2 - Determine the width required, in inches.

STEP 3 - From the chart below, select the appropriate width and the corresponding divider number. Example: 3½" required equals divider number **D5**.

STEP 4 - Use the drawer catalog numbers as a prefix to complete the correct catalog number. Example: Drawer catalog number is **240-45**, divider catalog number is **240-45-D5**.
