

Locker Accessories

Lock Options

Can be used with standard locker handle, and retrofitted to existing installations. For ordering information, contact your local Lyon dealer or factory representative.

Safe-O-Mat Locking System

- A coin-deposit locking system for facilities that desire self-service temporary locker storage, using conventional-style lockers.
- Ideal for student unions, employee lounges, health clubs, shopping malls, etc.
- Designed to be installed in the same manner as a built-in combination lock.
- Can be retrofitted to most existing lockers.
- Available from manufacturing schedules only.

Flat-key locks

Same lock fits all Lyon Lockers except Personal Effects & ExchangeMaster®. Easy to install and furnished with two keys.

to Cat. No.

Floor Anchoring Systems

NOTE: For conditions other than outlined below, please contact your local Lyon factory representative.

Locker Foot For Lockers With Legs

When backs are exposed (free-standing) a locker foot is recommended for all locker legs. When backs are against a wall and suitably wall anchored, locker feet are recommended on front legs only. For more details, see assembly instructions packed with lockers.

No. 5870

Anchoring Angle For Lockers Without Legs

Locker Anchoring Angles (running from front to rear on the inside bottom of the locker) provide a bearing surface for the fasteners which are connected to the floor or locker base. For the typical continuous-row locker installation, order one locker anchoring angle for each end of a row, plus sufficient quantity to provide angles on 36" centers. On single-row installations where backs are against a wall, lockers should be suitably wall anchored as detailed in assembly instructions packed with lockers.

No. 5872 – For 12" d lockers
No. 5873 – For 15" d lockers

No. 5874 – For 18" d lockers
No. 5875 – For 21" d lockers
